

Amendments to the Grain Code

MSC.552(108) - Amendments to the Grain Code

C.A.M.E.L. Loading Instrument

Effepi provides also a loading instrument with the option for the "specially suitable compartment" called "partly filled, with ends untrimmed" in an easy way for the user

TECHNICAL - ADVISORY

Application:

The amendments will enter into force on January 1, 2026.

They will apply to both new and existing ships that transport grain in bulk, under the newly defined set of loading conditions, starting from that date.

Developments :

According to the requirement a new addendum Grain Stability Booklet should be development and to be submitted to the class for their review and approval.

This addendum will contains all relevant calculation for the hold is not filled to the maximum extent possible in way of the hatch opening but is filled to a level equal with or above the bottom edge of the hatch end beams and has not been trimmed outside the periphery of the hatch opening.

Drawing approval on or before 2026:

- An addendum to the approved grain loading stability manual with the new condition, may be prepared and submitted for approval.

-The loading instrument, which meets the amendments to the Grain Code, needs to be prepared and submitted to the class for approval
